Further details:

It's not all about tourism. To "exploit" what remnant beauty we have left in this State for the purposes of fuelling short term financial benefit is very seriously at odds with what ultimately makes places like South Australia worth visiting in the first place. Tread carefully. Do no harm. Knee-jerk reactions on the basis (excuse) of lost income from Covid does not form proper justification for expansive changes, despite what particular senior Government Ministry would like for the general public to believe with the spin. Please stop treating our land as nothing more than a place to make profit.
